

# SUSTAINABLE DEVELOPMENT

What is the sustainable development goal 12?  
And how can we, the companies and the countries contribute to a sustainable development?

Group 2: Adam, Torjus, Lea, Marie and Ahmed

## How can companies become more sustainable?

Develop products and services specifically designed for poor people

Improving access to basic, goods and services for people who lives in poverty.

Make demands on your most important manufacturers and suppliers – for example to check if the raw materials are made in a sustainable way.

Gradually switch to renewable energy.

Improve industrial machinery and hire more workers to manufacture more products.

## Sustainable development goal

nr 12 is one out of 17 goals The United Nations has set to eradicate poverty, combat inequality and to stop climate changes before 2030.

The sustainable development goal 12 is about sustainable consumption and production patterns. Doing more with less resources. One example of not sustainable development is that **one third** of the food produced, goes away without being eaten.

## 385 000 TONS OF FOOD ARE TROWN AWAY IN NORWAY EACH YEAR

## How can we become more sustainable?

All of us can have an impact on the sustainable development in the world. We make choices every day that impacts the rest of the world. Where you choose to buy clothes or what food you eat, it all has an effect on the planet. We can recycle or just throw the trash outside. We can choose to buy clothes made from child labour or buy them from companies whose workers are adults and paid fairly for their work.

## How can countries become more sustainable?

To achieve a sustainable development, all countries need to act. We need to focus on using renewable resources such as hydro energy and solar energy. These two forms of energy is The rich part of the world stands for 2/3 of the world's emissions. For example, the oil (which is a fossil fuel), has made Norway rich. We need to lower these dangerous emissions, before it's too late!

## WE WOULD NEED ABOUT 3.5 GLOBES

## IF EVERYONE ON THE EARTH HAD THE SAME LIFESTYLE AS AN NORWEGIAN
