Welcome to FAS

Framhaldsskólinn í Austur-Skaftafellssýslu

FAS is a secondary school in Iceland

• The school is located in the town Höfn in the county of Austur Skaftafellssýsla.

History of the school

- The school was founded in 1987 and was first in a school building 7 km away from Höfn
- 2002 the school moved to Höfn in the building Nýheimar (New World)

Field of Studies

• Humanities and Social Sciences

- Natural Sciences
- Elective Program
- Engineering Study
- Mountaineering Study
- Horse training Study

Standard courses of FAS

• The Natural science is learning about physics, chemistry, biol ogy etc.

• The Humanities and Social Sciences is learning about sociology, philosophy, psychology etc.

• Elective program is for students who want to learn things like art, sports, etc.

•Engineering studies is about working with machines 750 Kw or less.

Other Courses of FAS

- •Mountaineering study:
- mountaineering
- cliff and glacier climbing
- cycling
- canoeing
- first aid, , etc.
- Horse training study:
- is about training of horses
- ownership of horses
- running a horse farm and working with tourism

There are about 200 student in FAS

•There are 60 students that attend class regularly

•The rest are students that attend irregularly or are distance learners.

What makes FAS special

- A final interview with a teacher instead of a written final exam
- Many different surveys about nature.
- A portfolio for each class

The nature surveys

• We measure a specific grid of trees and count them in the sand Skeiðarássandur

• We estimated the melting of two outlets from glacier Vatnajökull

•In FAS we also have a survey were we count birds and bird species.

Social life

•The social life in the school is very good because most of the people know each other.

•There are many clubs and many club events.

• we have annual festival

Thank you for your time
