

Tourism and SDG8

Jona, Mari, Sigrid, Sofia and Sævar

Monday

- We visited the Lava center in Hvolsvöllur; here we got information about eruptions and volcano activity
- We visited a waterfall named Skógafoss and walked up to the top.
- We went to the beach Reynisfjara and got attacked by wind and sand
- We visited the town Vík and the weather was awful
- Then we went to Katla Hotel where everything was great

Tuesday

- We went to the village Kirkjubæjarklaustur and the weather was good
- The glacier lagoon Jökulsárlón
- We visited Glacier Adventure at Hali
- We went to the museum Þórbergssetur
- We took a group photo at Hali
- The guests went to their host families
- We went swimming in the evening
- Then in the end of the day we went to the Youth Center Prykkjan

How tourism supports SDG8

- Tourism allows more job opportunities
- Tourism gives more money and demand into small societies which in turns allows local manufactures to get enough money to make local food and items for future tourists
- The government gets more tax money to invest in more sustainable opportunities for the future

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Conclusion

- Companies we visited protect nature, landscape and diversity of nature
- They also use a lot local companies and co-operate with them and use local products, e.g., Norður-Vík hostel
- The Vatnajökull national park educates people and arranges guided tours for visitors

Finland and Norway - sustainable tourism

- In Finland sustainable tourism is mostly the same as in Iceland
- In Norway there are electric boats and other cruise ships that have invested in green technology
- All three countries (Finland, Iceland and Norway) can improve in sustainability and green technic
