 - Outdoor ice –rink in winter
 - Ski tracks in winter
 - Great lake for swimming

Sights of Vaala

Gneiss-rock

- The oldest gneiss rocks in the Lake Oulujärvi area were born 2,700 to 2,600 million years ago. At that time, there was not much oxygen in the Earth's atmosphere, and life had evolved to the level of primitive cyanobacteria. The long history of gneisses can be seen in their appearance as stripes and strong folds, which are caused by movements of the earth's crust, such as collisions between continental plates.

Manamansalo

- Manamansalo is the fifth largest island of Finland's inland waters. Its 80-meter coastline is largely sandy. Manamansalo is known for its sand ridges.

Granaries at Lamminaho

Lamminaho is a part of the Finnish peasant culture, which shows history of Finland

Hydroelectric power-plant of Jylhämaa

One of the eight power-
plants that are by the
River Oulujoki

Säräisniemen kirkko

- Säräisniemi church is an idyllic and beautiful wooden church built between 1779 and 1781. It was built near Säräisniemi to replace the Manamansalo church, which was destroyed during the Rappa wars in the 16th century.

Tiedon aukio "The square of knowledge"

- Library, day nursery and comprehensive school are located around the square.

A long, single-story building with a dark, corrugated metal roof and a light-colored, vertically-ribbed facade. The building has several windows and a central entrance with a small white railing. The name 'VAALAN PÄIVÄKOTI' is written in white capital letters on a dark horizontal band above the entrance. The building is surrounded by a paved area, grass, and trees. A tall, thin tree stands to the right of the building. The sky is clear and blue.
